1. Introduction

This document defines the changes made to the Network Manager product for 4.7.0.0 Fix 11 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your Bentley account manager.

2. Fix Details

Fix Details Baseline Release	4.7.0.0
Fix Description	Added new local document repository functionality to allow the possibility of referring to a file server on a user's site.
Prerequisites	
Implementation Instructions	The staging folder is the location of the folder that exnm04070003en_updt11.exe was extracted to (the folder containing this readme). Log onto SQL*Plus as the Highways Owner with the staging folder as the working directory. At the prompt type START nm_4700_fix11.sql and press return. Exit SQL*Plus Go to the relevant exor\bin directory on the Oracle Weblogic Server and rename the following files:- • doc0100.fmx to doc0100_old.fmx • doc0118.fmx to doc0118_old.fmx • doc0120.fmx to doc0120_old.fmx • webutil.plx to webutil_old.plx Then copy in the new versions of these files from the staging folder.
Limitations	
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

CONFIDENTIALITY STATEMENT

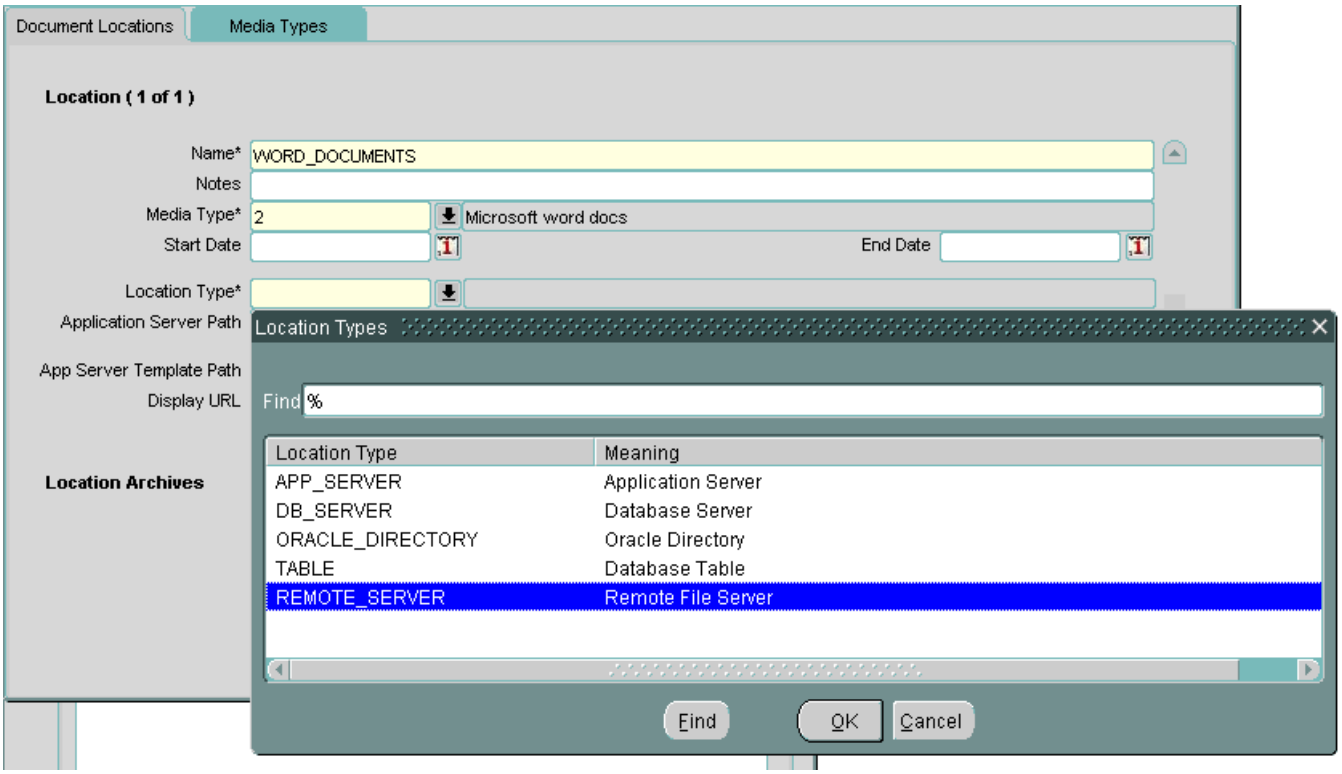
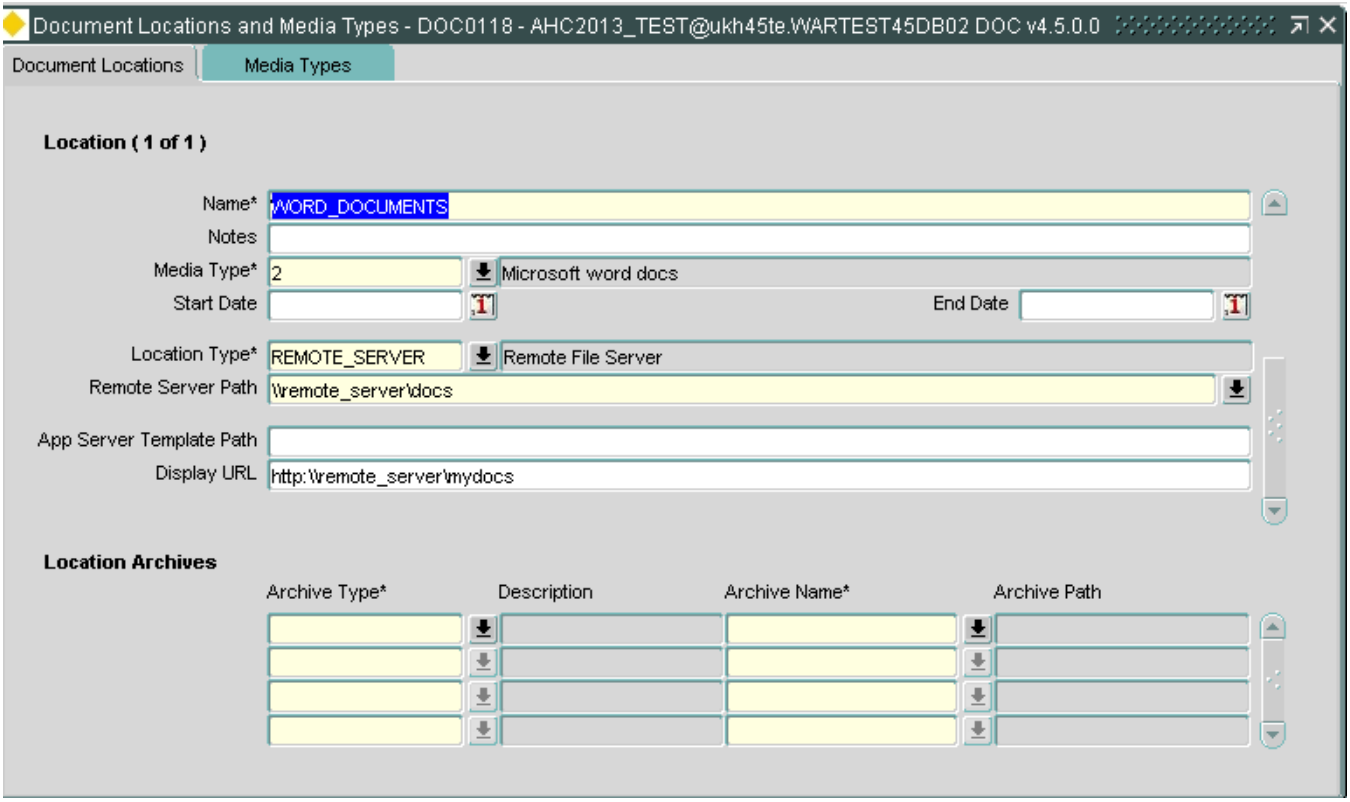
2.1 Details of change



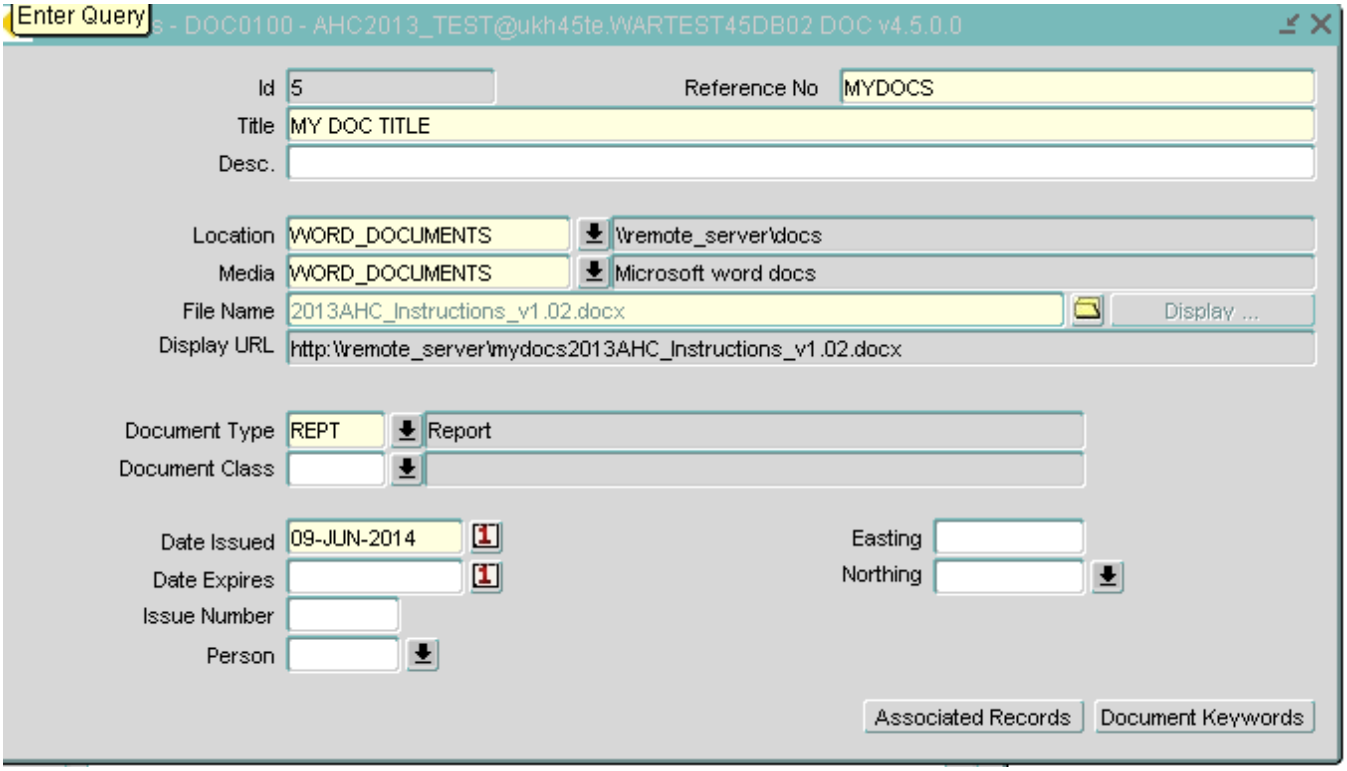
A fifth option for document location has been added that allows users to store and view documents on a local server located remotely to MAS. This new option has an associated product option called 'MSREMSVR' which has a default value of 'N' to indicate that the database is not hosted by managed services. For managed service installations the value of the flag needs to be set to 'Y' via the HIG9130 - Product Options form.

CONFIDENTIALITY STATEMENT
The contents of this document, including system ideas and concepts, are confidential and proprietary in nature and are not to be distributed in any form without the prior written consent of Bentley Systems inc.



The option is defined as a remote file server location and allows users to define a UNC and/or URL that refers to a local server location.

CONFIDENTIALITY STATEMENT
The contents of this document, including system ideas and concepts, are confidential and proprietary in nature and are not to be distributed in any form without the prior written consent of Bentley Systems inc.



The location defined in DOC0118 is displayed in both DOC0100, shown above, and in DOC0120 shown on the next page.
