

Network Manager

Release Notes v4.0.5.4 Fix 77

Introduction

This document defines the changes made to the Network Manager product for fix release v4.0.5.4 Fix 77 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **exor** account manager.

Fix Details

Baseline Release	4.0.5.4
Fix Description	This is a fix for a specific customer after problems were noticed in their upgrades. In effect it is a series of DDL that was not executed when fix 14 had been applied. Along with the repair DDL, this fix contains packages that were also missed off fix 14. If fix 14 were to be re-applied, problems in the packages would arise and hence the need for this fix.
Prerequisites	
Implementation Instructions	<p>Unzip the contents of nm_4054_fix77.zip into a staging folder</p> <p>Go to the relevant exor\bin folder on the Oracle Application Server and rename the following file:</p> <p>nm0511.fmx to nm0511_old.fmx</p> <p>Copy the new nm0511.fmx from either the f60 or f90 folders under the staging area depending on whether Oracle forms 6.0 or 9.0 is used.</p> <p>Log on to SQL*Plus as the Highways owner with the staging folder as the working directory. At the prompt type "Start nm_4054_fix77.sql" and press return.</p> <p>Exit SQL*Plus</p> <p>As this is intended to reset the database state into one which is critical to ensure correct operation of the application it is imperative that any errors from this upgrade are immediately reported to the support representative.</p>
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
nm3extent.pkw	2.3
nm3homo.pkw	2.17
nm3inv_update.pkw	2.4
nm3load.pkw	2.3
nm3load_inv_failed.pkw	2.2
nm3lrs.pkw	2.3
nm3mapcapture_int.pkw	2.3
nm3mapcatpure_ins_inv.pkh	2.2
nm3pla.pkw	2.1

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Exor Support
- Issues raised internally by Exor

Issues

Internal Task ID	Issue	Support Log(s)
0112126	Unique Constraint Error and ST Number	8001384309
0112126	Ambiguous Linear Reference	8001384308
