

Network Manager

Release Notes v4.2.1.0 Fix 6

Introduction

This document defines the changes made to the Network Manager product for fix release v4.2.1.0 Fix 6 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **exor** account manager.

Fix Details

Baseline Release	4.2.1.0
Fix Description	If the transfer of a file fails, the transaction is fully rolled back. Previously you could have a doc and doc association but no file for the doc to point at.
Prerequisites	Core 4.2.1.0 Fix 2 must be implemented before proceeding with this fix.
Implementation Instructions	<p>Unzip nm_4210_fix6.zip to a staging folder.</p> <p>Go to the relevant exor\bin directory on the Oracle Application Server and rename the following files:-</p> <p>doc0310.fmx to doc0310_old.fmx</p> <p>Then copy in the new versions of these files from the staging folder.</p> <p>Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory. At the prompt type "START nm_4210_fix6.sql" and press return. Exit SQL*PLUS.</p>
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
doc0310.fmx	3.3
doc_bundle_files.vw	3.1
doc_bundle_loader.pkh	3.2
doc_bundle_loader.pkw	3.8
nm_4210_fix6.sql	3.0

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Exor Support
- Issues raised internally by Exor

Issues

Internal Task ID	Issue	Support Log(s)
0110677	Within the document bundle loader, the creation of the doc/doc assoc and the move of the file to the doc location need to be treated as a single transaction - and if any part fails then the transaction must be rolled back.	729454
