

Network Manager

Release Notes v4.3.0.1 Fix 14

Introduction

This document defines the changes made to the Network Manager product for fix release v4.3.0.1 Fix 14 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **Bentley** account manager.

Fix Details

Baseline Release	4.3.0.1
Fix Description	Network Manager 4.3.0.1 Fix 14 Patchset. Changes meant to allow queries of assets on routes has been disabled as it has had an impact of including standard assets that are outside of the range of a network query.
Prerequisites	
Implementation Instructions	Unzip nm_4301_fix14.zip to a staging folder. Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory. At the prompt type "START nm_4301_fix14.sql" and press return. Exit SQL*PLUS.
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
log_nm_4301_fix14.sql	3.0
nm3gaz_qry.pkw	2.17.1.2
nm_4301_fix14.sql	3.0

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Bentley Support
- Issues raised internally by Bentley

Issues

Internal Task ID	Issue	Support Log(s)
0111819	Changes were implemented to allow queries of foreign table assets that have a network reference relative to a route. There is a minor problem in one area of code that can result in too many rows being returned when used with a part-of-route and a standard asset type. It can manifest itself in errors when used with assets on a route.	8001299101
