

Network Manager

Release Notes v4.0.5.4 Fix 75

Introduction

This document defines the changes made to the Network Manager product for fix release v4.0.5.4 Fix 75 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **Bentley** account manager.

Fix Details

Baseline Release	4.0.5.4
Fix Description	Network Manager 4.0.5.4 Fix 75 Patchset. MapCapture load package has been changed to avoid locating child assets where the relationship type is AT and the parent is already located.
Prerequisites	
Implementation Instructions	Unzip nm_4054_fix75.zip to a staging folder. Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory. At the prompt type "START nm_4054_fix75.sql" and press return. Exit SQL*PLUS.
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
log_nm_4054_fix75.sql	3.0
nm3mapcapture_ins_inv.pkw	2.5.1.0
nm_4054_fix75.sql	3.0

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Bentley Support
- Issues raised internally by Bentley

Issues

Internal Task ID	Issue	Support Log(s)
0111806	Complexities arising from testing and loading locations of child assets with an inherited location during the loading of data from MapCapture load files have been simplified. The code will now ignore any child locations in cases where the child asset type has an AT relation to the parent and where the parent location exists. Other areas of code will ensure that the child asset location is inherited from its parent.	8001298259
