4. Log No. Summary

This chapter summarises all software issues that have been addressed by this fix.

For issues raised by customers, Bentley Technical Support Group (TSG) Ticket Numbers are cross referenced where applicable.

<i>Details</i>	<i>Internal Reference</i>	<i>TSG Ticket Number</i>
In NM0590, it's impossible to remove attribute details. After modifying the details and saving, the changes do not appear after re-querying.	TFS 129911	SR#7000231990
In NM0590, the 'End Location' button is not available, preventing the re-assignment of an XSP, unless the XSP is valid for the current Network Location sub class. NM0590 has been modified to include this	TFS 158954	
When a query returns no records, the query function is cancelled with no error messages instead of the expected 'query caused no records to be retrieved' message. NM0590 has been modified to produce a message when a query returns no records	TFS 158960	SR#8001593673
When Creating a new asset in NM0590, after tabbing from the Asset Type field, a message will pop up telling you that the mandatory attribute field must be entered. All mandatory attributes must then be entered before continuing. The form has been modified to only validate mandatory attributes when appropriate	TFS 158964	SR#7000220744
NM0590 was allowing for the creation of foreign table assets. The form has now been modified to only allow for these to be queried, and not created	TFS 158965, TFS 158972	
In NM0590, when an Asset has an XSP value defined, and has been located, the form was not allowing for the change of XSP, even though the XSP was valid for the location type assigned.	TFS 158968	
When creating Asset details in NM0590, after errors are encountered the form can become 'locked' preventing entry of values, when the form indicates these should be entered. NM0590 has been modified to improve exception handling	TFS 129658	SR# 7000229109
