Network Manager Release Notes v4.2.0.0 Fix 57

## Introduction

This document defines the changes made to the Network Manager product for fix release v4.2.0.0 Fix 57 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your *Bentley* account manager.

## Fix Details

Baseline Release	4.2.0.0
Fix Description	Network Manager 4.2.0.0 Fix 57 Patchset.
	Change to allow the context sensitive LOV in Locator to be consistent with the map theme in both the pinned and unpinned maps
Prerequisites	
Implementation Instructions	Unzip nm_4200_fix57.zip to a staging folder.
	Go to the relevant exor\bin directory on the Oracle Application Server and rename the following file:-
	inc
	nm0572.fmx to nm0572_old.fmx
	Then copy in the new version of this file from the staging folder.
	Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory.
	At the prompt type "START log_nm_4200_fix57.sql" and press return.
	Exit SQL*PLUS.
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

## List of Amended Files

Filename	Version
log_nm_4200_fix57.sql	3.0
nm0572.fmx	4.28.1.0

# Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Bentley Support
- Issues raised internally by Bentley

### Issues

Internal Task ID	Issue	Support Log(s)
0111899	Locator maintains two distinct maps one that is pinned to the locator form window and one that is unpinned. Previous versions failed to synchronize the active theme from the unpinned map with the context sensitive List of Modules.	8001139145
