1. Introduction

This document defines the changes made to the Network Manager product for 4.8.0.x Fix 1 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your Bentley account manager.

2. Fix Details

Fix Details Baseline Release	4.8.0.x
Fix Description	Network Manager 4.8.0.x Fix 1 Patchset
Prerequisites	
Implementation Instructions	The staging folder is the location of the folder that exnm04080001en_updt1.zip was extracted to (the folder containing this readme).
	Go to the relevant exor\bin directory on the Oracle Weblogic Server and rename the following files:-
	webutil.plx to webutil_old.plx doc0120.fmx to doc0120_old.fmx hig2510.fmx to hig2510_old.fmx hig1815.fmx to hig1815_old.fmx
	Then copy in the new version of the file from the staging folder.
	Go to the relevant <oracle_home>\forms\java directory on the Oracle WebLogic Forms Server and rename the following files –</oracle_home>
	exor-mapviewer.jar to exor-mapviewer_old.jar exor_login_util.jar to exor_login_util _old.jar
	Then copy in the following jars from the staging folder directory –
	exor_login_util.jar exor-mapviewer.jar
	If the Java Shapefile Tool has been configured, as specified in Section 4.6 of <i>Core Release Notes</i> v4.8.0.0.pdf document, identify the location of sde2shp.jar and rename:
	shp2sde.jar to shp2sde_old.jar
	Then copy in the shp2sde.jar from the staging folder
	Log onto SQL*Plus as the Highways Owner with the staging folder as the working directory.
	At the prompt type START nm_4800_fix1.sql and press return.
	Exit SQL*Plus
Limitations	
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

3. List of Amended Files

Filename	Version
webutil.plx	5.4
doc0120.fmx	5.8
hig2510.fmx	5.2
hig1815.fmx	5.4
sdo_lrs.pkw	1.6
sdo_lrs.pkh	1.4
nm3inv.pkh	2.9
nm3_java_utils.pkh	1.1
nm0575.pkw	2.16
nm3sdo.pkw	2.102
nm3jobs.pkw	3.15
nm3web.pkw	2.7
nm3close.pkw	2.24
nm3invval.pkw	2.24
nm3undo.pkw	2.38
register_aggr_theme.prw	1.1
CMDUtilities.java	1.2
exor-mapviewer.jar	1.12
exor_login_util.jar	1.5
shp2sde.jar	1.2
mci_ldjava_11g.bat	1.0
nm_inv_items.trg	2.8
nm_4800_fix1.sql	1.1

Network	Manager	[·] Fix Release	Note:
---------	---------	--------------------------	-------

4. New Roles

This fix introduces three new roles that are related to specific Java functions and these roles will need to be granted to any user that intends to use the following operations:

EXTRACT_SHAPE_FILE This role is required for anyone who wishes to extract a Shapefile from t system.	
UPLOAD_SHAPE_FILE	This role is required for anyone who wishes to upload a Shapefile into the system.
CHECK_XSS	This role is required for all TIG users to use the identify XSS vulnerable URLs and prevent such attacks.

5. Java Tools

1. Creation of Additional Database Objects -

Run mci_ldjava_11g.bat from Command Prompt with staging folder as working directory.

Usage: mci ldjava 11g.bat user/pass@connect

Note -

- a. The system executing this batch file must have **loadjava** utility. This can be confirmed by running the command loadjava—help—on a **Command Prompt** on the system, if it shows the help options, the batch file can be run. Generally, **loadjava** is available on systems with Oracle Database or Oracle Database Client or Forms & Reports Server installed.
- b. In case the system has *more than one Oracle Homes*, e.g. installing Oracle Database Server, Oracle Database Client 32 bit and Oracle Database Client 64 bit on the same system creates three Oracle Homes, PATH Environment Variable needs to be set before running the batch file on the same Command Window. First entry in the PATH variable must be the Oracle Home directory path for the Database Server.

C:\Stage\exnm04070001en_updt17>SET PATH=D:\Oracle\Product\11.2.0.2\Bentley;%PATH%
C:\Stage\exnm04070001en_updt17>mci_ldjava_11g.bat user/password@connect

c. User must be the **Highways Owner**.

2. Creation of Environment Variable for MapCapture –

A new environment variable called — SDE_UTIL_PATH will need to be created on the database server that points to the Shapefile jars (e.g. sde2shp.jar, shp2sde.jar etc.) location.

1	Network Manager Fix	Release Notes			
	4.8.0.x Fix 1	Date: 23rd December 2019	Page 5 of 6		

After creation the database server will need to be **restarted**.

3. Creation of Environment Variable for TIG -

A new environment variable called $- xss_util_path$ will need to be created on the database server that points to the tig-xss.jar location (Please refer "Transportation Intelligence Gateway Deployment Guide" for more details on tig-xss.jar).

After creation the database server will need to be **restarted**.

6. Log No. Summary

This chapter summarises all software issues that have been addressed by this fix.

For issues raised by customers, Bentley Technical Support Group (TSG) Ticket Numbers are cross referenced where applicable.

Details	Internal Reference	TSG Ticket Number
When attempting to associate a document in DOC0120, exception 'ORA-0000 Normal, successful completion.' is produced	Defect 1066410	SR# 7000849558 SR# 7000885943 SR# 7000978511 SR# 7000980688
AWLRS failure with 4.8 NSG due to sdo_lrs prerequisite	Defect 1068326	
Delete Global Assets - Hierarchical Assets with a non-mandatory relationship in their hierarchy cannot be deleted.	Defect 1047761	
MCI - Error creating defect on asset	Defect 1063841	
Can't load a document via Load document bundles.	Defect 1055200	
Update Copyright notice and version for 4.8 release in CSV Upload page.	Defect 1050906	
Can't run register_aggr_theme.sql.	Defect 1052253	
Document display doesn't work in Associated documents form (app and db locations).	Defect 1054916	
Implementation Version is incorrect under the Applet Info button on the Locator map	Defect 1062444	
After applying Core 4700 Fix 62, if a hierarchical asset contains a child asset that has been end-dated in the past, the parent asset cannot be closed. Exception 'ORA-20000: NET-0012: End date is out of range of parent ' is encountered	Defect 1073834	SR# 7001010065
