Prerequisites	
Implementation Instructions	Unzip nm_4301_fix18.zip to a staging folder. Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory. At the prompt type "START nm_4301_fix18.sql" and press return. Exit SQL*PLUS.
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
doc_bundle_loader.pkw	3.6.1.0

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Exor Support
- Issues raised internally by Exor

Issues

Internal Task ID	Issue	Support Log(s)
0112180 (Same as 0112084)	The doc-bundle-loader would create documents with a date-issued value with a corrupted century due to an inadequate date conversion. This problem could arise through the use of the default values in the argument to the API but is also caused from the direct call to the API in the doc-bundle-loader package body. The problem is corrected in this fix purely from the use of the doc_bundle_loader package although in future releases, the fix is made in both the default values in the base API inside the doc-bundle-loader package.	8001408214
