Network Manager
Release Notes v4.2.0.0 Fix 56

Introduction

This document defines the changes made to the Network Manager product for fix release v4.2.0.0 Fix 56 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **Bentley** account manager.

Fix Details

Baseline Release	4.2.0.0
Fix Description	Network Manager 4.2.0.0 Fix 56 Patchset. Nm3gaz_qry changes to fix problems in PBI Query where no network found
Prerequisites	
Implementation Instructions	Unzip nm_4200_fix56.zip to a staging folder. Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory. At the prompt type "START nm_4200_fix56.sql" and press return. Exit SQL*PLUS.
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
log_nm_4200_fix56.sql	3.0
nm3extent.pkw	2.3.1.2
nm3gaz_qry.pkw	2.3.1.2
nm_4200_fix56.sql	3.1

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Bentley Support
- Issues raised internally by Bentley

Issues

Internal Task ID	Issue	Support Log(s)
0111785	This fix repairs the problem with using PBI queries which executed to give no results with an error suggesting that no network obeying the criteria could be found. Also, PBI queries returned incorrect results in some cases where a network extent over which the query was executed was smaller than the coverage of the asset.	8001274633
