Network Manager
Fix Release Notes

4.7.0.x Fix 28

Table of Contents

1. Introduction

This document defines the changes made to the Network Manager product for 4.7.0.x Fix 28 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your Bentley account manager.

2. Fix Details

Fix Details Baseline Release	4.7.0.x
Fix Description	Update the password stored in Highways Owner schema when changed using methods other than form - HIG1833. This change is to support MapCapture Interface (MCI) as the above mentioned password is used in MCI to work with Shapefiles.
Prerequisites	
Implementation Instructions	The staging folder is the location of the folder that **exnm04070001en_updt28.zip** was extracted to (the folder containing this readme). Go to the relevant **exor\bin** directory on the **Oracle WebLogic Application Server** and rename the following files – **hig1807.fmx** to **hig1807_old.fmx** Then copy in the **new version** of the file from the staging folder. Log onto **SQL*PLUS** as the **Highways Owner** with the staging folder as the working directory. At the prompt type **START nm_4700_fix28.sql** and press return. **Exit** SQL*PLUS.
Limitations	
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

3. List of Amended Files

Filename	*Version*
hig1807.fmx	5.3

4. Log No. Summary

This chapter summarises all software issues that have been addressed by this fix.

For issues raised by users, Bentley Technical Support Group (TSG) Service Request Numbers are cross referenced where applicable.
