Network Manager
Release Notes v4.2.0.0 Fix 53

Introduction

This document defines the changes made to the Network Manager product for fix release v4.2.0.0 Fix 53 and is specifically targeted at end users.

After reading through this document, should you have any further training or consultancy requirements then please contact your **Bentley** account manager.

Fix Details

Baseline Release	4.2.0.0
Fix Description	Network Manager 4.2.0.0 Fix 53 Patchset.
Prerequisites	
Implementation Instructions	Unzip nm_4200_fix53.zip to a staging folder. Log onto SQL*PLUS as the Highways Owner with the staging folder as the working directory. At the prompt type "START nm_4200_fix53.sql" and press return. Exit SQL*PLUS.
Limitations	None known
Configuration Information	None
How To Test	Recommend full regression test
Rollback Strategy	Initially implement on a test environment

List of Amended Files

Filename	Version
log_nm_4200_fix53.sql	3.0
nm3sdo.pkw	2.33.1.10
nm_4200_fix53.sql	3.0

Log No. Summary

This chapter summarises all software changes that have been made in this release.

These changes are derived from the following sources,

- Issues raised by Customers via Bentley Support
- Issues raised internally by Bentley

Issues

Internal Task ID	Issue	Support Log(s)
0111434	The code to perform a spatial query on views passes through two filters. In the second of the filters, in cases where the feature table is not the same as the theme table and where the theme label column is present in both, the code will fail. It requires an alias in part of the query. This problem had been fixed in a later release so this is a back-port of the same fix. The code has also been made to work in cases where the label column is greater than 100 characters.	8001170626 8001170630
